Important event to report

In accordance with the regulations on issuers and securities transactions, we inform shareholders and interested persons that **Ascendia S.A.** has signed a **partnership** agreement with **Edu Apps S.R.L.**, whose object is the offer to the teachers in Romania of quality eLearning solutions, by listing the educational materials authoring tool LIVRESQ, owned by Ascendia, in the ClasaViitorului.ro platform owned by Edu Apps. Due to the facilitation of access to consecrated tools, the platform is recommended to schools by the Ministry of Education and Research in Romania.

We attach to this report the **Press release**.

CEO
ASCENDIA S.A.
Cosmin Mălureanu

PRESS RELEASE

Bucharest, April 7th, 2020

**LIVRESQ is the first Romanian eLearning solution
connected to ClasaViitorului.ro,
platform recommended by the Ministry of Education and Research**

The crisis we are experiencing right now has shown a old weakness of the educational system – the incomplete adaptation of the teaching process to the use of digital tools.

Ascendia and Edu Apps start a strategic partnership through which they join forces to offer the necessary support for teachers in Romania to digitize the teaching process.

The Ministry of Education and Research recommends, as a solution for continuing teaching online classes, that schools register for free on the **ClasaViitorului.ro** platform, developed by Edu Apps, a solution made available to any educational institution by Edu Apps for years. The platform facilitates access to educational licenses offered for free by technology giants Google and Microsoft.

Ascendia is today joining this list through **LIVRESQ**, a solution that is being offered for free by the company to the Romanian teachers.

LIVRESQ (www.livresq.com) is an authoring tool for education. It facilitates the creation of **interactive lessons**, containing texts, photo galleries, animations, audio, video, quizzes and other elements, without the need for programming skills.

The lessons created in LIVRESQ can be downloaded for offline use or **can be easily shared over the Internet through the LIVRESQ Library**, children being able to access them from any type of smart device (phone, tablet, PC). Also, the lesson packages are compatible with Learning Management System solutions, respecting SCORM, the internationally recognized standard in eLearning.

*"We are thrilled that Ascendia, one of the most important companies developing eLearning solutions from Romania, has come to us and together we can now offer **a complete eLearning solution for teachers**. Basically, the solution package offered for free by Edu Apps, through ClasaViitorului.ro, is now completed with LIVRESQ, **an indispensable tool for digitizing lessons**." , Says Stefan Apăteanu, CEO of Edu Apps.*

As a result of the very good feedback received from the teaching community, LIVRESQ is recommended by the Ministry of Education and Research from Romania to be part of the eLearning solutions for which official online training for teachers is done.

*"We believe that it is our duty to help Romania's teachers **create quality educational content**, using quality tools. ClasaViitorului.ro is a solution that offers access to such tools and LIVRESQ is the only Romanian solution for building eLearning courses and interactive digital resources that meets international standards regarding **authoring tools of educational content**. It is a natural partnership, meant **to support the Romanian educational system**." , says Cosmin Mălureanu, Ascendia CEO.*

All teachers who have email accounts registered through ClasaViitorului.ro can create an account in LIVRESQ (www.livresq.com) and benefit from a 1 year free use license, with the possibility of extension every year. Teachers who are not yet in the specified system can apply for a free license LIVRESQ using the form available in the "Academic" section of the portal or they can ask the school representatives to enrol in ClasaViitorului.ro.

Edu Apps S.R.L. is an authorized partner of Google and Microsoft and manages projects implemented in over 1700 educational institutions in Romania. **The G Suite for Education free license**, but also the **free Office 365 A1 license** can be activated free of charge at www.clasaviitorului.ro by any educational institution. The user account generated through this platform can be used for authentication in educational platforms developed by third parties, as long as they have implemented the authentication with the Google or Microsoft account.

Ascendia S.A. is the first **eLearning** company from Romania listed on the Bucharest Stock Exchange (ASC trading symbol), with over 13 years experience in creating eLearning solutions - digital courses and Learning Management System platforms. The company is known for the **CoffeeLMS** learning platform and the **LIVRESQ** eLearning authoring tool.
